### General Description

The WL-BPD600MA is an AC-coupled high-speed dual-balanced (differential) InGaAs photoreceiver. Due to its high transimpedance gain, its very low noise, and its bandwidth of typically 620 MHz, it is ideally suited for ultrahigh speed swept-source OCT systems with depth scan line rates up to above 300 kHz.

The WL-BPD600MA comes in a rugged aluminum case with two FC fiber receptacles and a 50  $\Omega$  SMA output. It operates from a single 11–15 V DC supply. OEM versions are available upon request.

### Mechanical Properties

- Fiber coupling: FC receptacles for FC/PC and FC/APC connectors
- RF output: SMA (female)
- Supply voltage input: Push-pull LEMO plug (included with diode)
- Small form factor: 50×60×20 mm (weight: 105 g without cable)
- Mounting: 4x M2.5 threaded holes on bottom (screw length 4 mm)

### Electrical Connectors

Supply connector (front view). The case is electrically connected to ground. There are two types of supply cable, one has 2 wires (new cable) and one has 5 wires (old). The corresponding color scheme of these cables is:

Cable type	Positive supply	Supply ground
2-wire	white	brown, shield
5-wire	yellow	grey, shield
